Objective:

Computer Science undergraduate with hands-on experience in MERN Stack development and a strong interest in Cloud Computing and DevOps. Familiar with AWS Cloud services, Docker, Git, and CI/CD concepts, and eager to build scalable web applications while expanding expertise in cloud infrastructure and deployment automation. A quick learner committed to contributing effectively and growing in cloud and software engineering roles.

Education:

BE Computer Science and Engineering 2023-2027

Kumaraguru College of Technology - CGPA 7.41

Higher Secondary (12th) (2021-2023)

GRD Public School – Percentage: 65.6%

Secondary School (10th) (Completed 2021)

GRD Public School – Percentage: 82.0%

Soft Skills:

- Problem Solving
- Leadership
- Team Collaboration
- Adaptability
- Communication

Technical Skills:

- MERN Stack Development
- AWS Cloud Services
- Docker & Containerization
- Git, GitHub & CI/CD
- Database Management (SQL & MongoDB)

Project :

1. **PixelForge** :A full-stack AI image generation web application built using **React, Node.js/Express, and MongoDB** that converts text prompts into AI-generated images through the **ClipDrop API**. Implemented **JWT authentication, bcrypt password hashing, and a credit-based user management system** with a responsive UI using **React Context API and Framer Motion**.
2. **CloudDeploy**:A cloud-native DevOps project that automates the deployment of a **Node.js** application using **Docker, AWS EC2, and GitHub Actions**. Configured a **CI/CD pipeline** for automated build and deployment while gaining hands-on experience with **Linux, cloud infrastructure, and containerization**.
3. **E-Commerce Platform for Local Artisans**: A full-stack **MERN** application enabling local artisans to sell products online. Features include **user authentication, product catalog management, shopping cart functionality, order processing, and responsive user interfaces** for seamless customer experience.
4. **MEDDD – Smart Hospital Application**: A healthcare management platform developed to simplify **appointment booking, health record tracking, and patient management**. Built with modern web technologies to provide an intuitive and responsive interface for patients and healthcare providers.

Certification:

1. Coursera – Design and Analysis of Algorithms
2. Coursera – Problem Solving Through Programming in C
3. Coursera – Crash Course on Python
4. Coursera – Software Engineering
5. Great Learning – Python Fundamentals for Beginners
6. Great Learning – Basics of Computer Networking
7. Infosys Springboard – Database Management Systems
8. Coursera - Machine learning techniques
9. AWS- AWS Certified Cloud Practitioner

Internship / Research:

Kovaion Consulting – MERN Stack Intern | May 2025 – June 2025

- Contributed to the development of **Sportzia**, a cloud-based sports technology platform, using the MERN stack (MongoDB, Express.js, React.js, and Node.js).
- Worked on frontend components, API integration, and backend feature development to enhance user experience and application functionality.
- Collaborated with the development team to implement responsive interfaces, test new features, and improve overall application performance while gaining hands-on experience in full-stack development and cloud-based application workflows.

Personal Interest:

- DevOps & Cloud Computing
- Web Development
- Robotics & Automation
- Problem Solving
- Community Service through Girl Up NGO
- Fitness & Gym Training
- Blogging
